

Sediment Filters

Built to Tackle Most Dirty Water Conditions

RainSoft Sediment Filters reduce silt, sediment, rust, scale particles, sand, algae, dirt and most other suspended matter from water.

They provide effective, dependable, low-cost solutions to many of the toughest water quality problems. Excellent for use in areas supplied by private wells. Also excellent for use in small towns and villages, even those with municipal filtration, where water still picks up suspended matter as it flows through the water distribution system.

Depending on the cartridge selected, RainSoft sediment filters are available to filter out particles as small as 1 micron in size. And they provide crystal-clear, cleaner water with a minimum of expense. Trim and compact, they operate with exceptional efficiency and will improve practically any dirty water situation.

Equipment Features

- Low initial and maintenance cost.
- Simplified installation and cartridge changing.
- 1, 5, 25 and 30 micron cartridges with high flow rates and low flow restrictions available (30 micron cartridge only available for Model 13216).
- Easy to service. To relieve line pressure, just press the red button on cap and unscrew bottom of container.

Maintenance Requirements

Filtering cartridge will eventually become exhausted or consumed and need replacement. Replacement schedule will depend on the quality of the incoming water and the amount and type of sediment present.

CALIFORNIA RESIDENTS: Water treatment devices sold to retail consumers in California accompanied by certain health claims must be certified by the California Department of Health Services. The Sediment Filter series is not certified by the State of California for the purpose of making health claims.

Benefits will be provided by various types of RainSoft equipment when installed and operated according to manufacturer's recommendations. Operational, maintenance and replacement requirements are essential for the product to perform as advertised. All claims based on best available information at time of printing. Manufacturer makes no representations as to the suitability of this equipment for a particular application. Buyer relies entirely on dealer's recommendations in the purchase of this equipment. Independent RainSoft dealers may include, together with your RainSoft product, a product or component that is not manufactured by RainSoft or their parent company, AWTP, LLC. Any non-RainSoft product may be covered by the manufacturer of that product, and is not covered by the RainSoft warranty. AWTP, LLC does not warrant that your RainSoft product and the non-RainSoft product will perform properly when used together, and assumes no liability therefore.
