BUILT TO LAST AND PROVIDE
YEARS OF DEPENDABLE SERVICE,
IT REALLY IS AN AMAZING SYSTEM!

WHAT IS CLEANSTART®?

CleanStart® is an innovative laundry solution designed to save you money and provide cleaner, fresher laundry than you've ever experienced!

Designed and engineered for the home, CleanStart® utilizes the same commercial cleaning technology found in larger systems for their laundry operations.

HERE'S HOW IT WORKS.

CleanStart® transforms cold water into a powerful cleaning agent by oxidizing normal tap water, injecting a controlled amount of activated oxygen into the wash water. After oxidizing and disinfecting, it leaves behind nothing but cleaner, fresher laundry!

BENEFITS:

- **ENERGY SAVINGS.** Only cold water is required, eliminating the energy required to heat the wash water.

- **DETERGENT SAVINGS.** The disinfecting and cleaning power of the CleanStart® system greatly reduces and often eliminates the need for laundry detergent, softeners and bleach.
(Pre-treating of stubborn stains is recommended.)

- **NO CHEMICAL IRRITATION.** Eliminates common skin irritation caused by harsh cleaning detergents and disinfection products – great for infants and those with sensitive skin.

- **LONGER LASTING CLOTHES.** Fabric life is extended by not using chemicals that cause fabrics to break down.

- **EXTRA CLEANING.** The rinse cycle becomes a second, powerful cleaning cycle.

- **LOW OPERATING COST.** Consumes less electricity than a 40 watt light bulb.

- **VERSATILE.** CleanStart® is compatible with all makes and models of washing machines – top loaders, front loaders, and high efficiency models.
