- Limited Lifetime Warranty
- User-Friendly Reliability

The RainSoft EC5 MAX Water Conditioning System with RainSoft Remind® Wireless App Monitoring

The RainSoft EC5 MAX Series water conditioning systems incorporate a redesigned control enclosure and simplified, intuitive interface. High-flow capabilities are perfect for larger homes and small businesses.

The RainSoft Remind®, app is available for both iOS and Android platforms. It lets you monitor your EC5 MAX system remotely, alerting you when your system needs salt or requires attention. You can

even schedule a service call right from your smart phone or tablet.

EC5 MAX Features

High Flow Rates The EC5 MAX has 50 to 75 percent higher flow rates than the standard EC5 water conditioner.

Power Outage Recovery If power is lost during the regeneration process, the EC5 MAX will automatically recover and complete the process once power is restored. This feature ensures that all scheduled regeneration cycles are never missed, and that soft water is always available.

Instant Informational Alerts The EC5 MAX provides real-time system status

notifications for low salt, loss of power and power restored, service reminders for filter changes, and other useful reminders. These notifications are provided on both the system display as well as the RainSoft Remind® app.

Redesigned Interactive Display The EC5 MAX provides easy-to-read and understandable system information via a six-line LCD display, which is ideally angled for optimal viewing.

Energy Efficient

Control The control operates with 24V DC power for safety and efficiency. A DC motor, coupled with our patented rotary position sensor, provides quick and accurate valve positioning with less movement than

other drive systems, resulting in longer seal life and reduced wear and tear.

Proportional Brine and Rinse Overall system efficiency is achieved with RainSoft's proportional brining feature. Saves on overall salt and water consumption with shorter regeneration cycles based upon specific household water usage.

EC5 MAX—water conditioning with high flow capability

How the EC5 MAX Water Conditioner Works

Step 1: Water enters RainSoft's exclusive rugged EC5 MAX control valve and flows down through the conditioning resin where calcium, magnesium, and other positively charged ions are removed.

Step 2: Once completely conditioned, the water exits the resin tank and flows throughout your home.

Step 3: At metered intervals, the unit begins a night time regeneration process. Using salt* as a regenerant, the retained hardness ions are flushed out of the system and down the drain.

Operating Features

- An LCD display prompts the user with easy to understand system information and messages.
- Full menu of settings allows you to

customize the system to your family's specific water usage.

- Computer control prevents you from running out of treated water.
- Control automatically compensates and adjusts for daylight savings time.
- The system maintains time up to 3 days without a battery backup in case of a power outage. Program settings are maintained indefinitely, eliminating the need to reprogram. When connected to the internet via your home network, the correct time of day is automatically maintained.
- Calculates and uses optimum salt and water combination for each regeneration.

* Potassium chloride may be used instead of salt as a regenerant.

CALIFORNIA RESIDENTS ONLY
EC5 MAX models are not registered in the State of California for the purpose of making health claims.

Other Benefits

- Injection molded enclosures fit tightly to protect control components from outside elements.
- The brine tank is equipped with an overflow protection system to protect against overflow due to power outages during regeneration.
- The EC5 MAX water conditioner provides detailed system status and operational information through both the control screen, and the RainSoft Remind® app.

Note that the RainSoft Remind® app is not required to take advantage of these features.

RainSoft EC5 MAX Water Conditioning Systems are UL listed.

Benefits will be provided by various types of RainSoft equipment when installed and operated according to manufacturer's recommendations. Operational, maintenance and replacement requirements are essential for the product to perform as advertised. All claims based on best available information at time of printing. Manufacturer makes no representations as to the suitability of this equipment for a particular application. Buyer relies entirely on dealer's recommendations in the purchase of this equipment. Independent RainSoft dealers may include, together with your RainSoft product, a product or component that is not manufactured by RainSoft or their parent company, Aquion, Inc. Any non-RainSoft product may be covered by the manufacturer of that product, and is not covered by the RainSoft warranty. Aquion, Inc. does not warrant that your RainSoft product and the non-RainSoft product will perform properly when used together, and assumes no liability therefore.
